**Summary** Software Engineering student with hands-on experience developing full-stack web applications using Spring Boot, PHP, and relational databases. Strong foundation in MVC architecture, REST APIs, frontend integration, authentication systems, and database design. Passionate about building secure, scalable, and user-focused web systems.

**Technical Skills**

- **Programming Languages:** Java, C#, PHP, JavaScript, SQL, HTML, CSS
- **Frameworks:** Spring Boot, ASP.NET Core MVC, Bootstrap
- **Data Bases:** MySQL, Oracle Database, Firebase
- **Tools:** Git, GitHub, Figma
- **Concepts:** MVC Architecture, REST APIs, Role-Based Access Control, Database Normalization (3NF), Secure Session Management

**Experience** **Software Engineering Student – Backend Development Focus**

- Developed secure web systems using Spring Boot and relational databases.
- Implemented authentication, role-based access control, and REST APIs.
- Applied clean architecture and database normalization principles.
- Collaborated in structured team projects with formal technical documentation.
- Designed and implemented multi-role authentication systems (Admin/User models).

**Education** Bachelor's Degree in Software Engineering  
Universidad Fidélitas | 2023 – Present

**Languages** Spanish – Native  
English – Upper-Intermediate (B2)
